

**AMENDMENT TO THE DRAWINGS**

The Examiner indicates that a scale bar for the size of the particles shown in Figures 2 and 3 is lacking. Applicants do not believe any such scale bar is needed so as to understand the invention; original claim 28 recites a range of size for the micelles of the invention.

Nonetheless, to comply with the apparent request of the Examiner, an amended sheet for Figures 2 and 3 providing a measurement scale is provided. Entry of the amended drawing sheet into the application is requested above. No new matter is introduced by the amended drawings.
